Project Assignment

Design and implement a real-world application that incorporates a relational database, demonstrating your understanding of Entity-Relationship (ER) modeling, relational schema design, and query operations.

You are free to choose any meaningful and functional system for implementation. Example project topics include (but are not limited to): Airline Reservation System, Hospital Management System, Library Management System, Music Store and Bookstore.

Projects may be completed in groups, with a **maximum of four students per group**.

All project materials must be submitted through the course page on **ekampus.ankara.edu.tr**.

Project Phase 1: Data Requirements (%10)   Due Date: 09.05.2025

Project Phase 2: Project ER Diagram (%20) Due Date: 09.05.2025

Project Phase 3: Project Implementation and Presentation (%60)   Due Date: 27.05.2025

Project Phase 4: Project Report (5 to 10 pages) (%10) Due Date: 27.05.2025
